Abstract of JP4089424

PURPOSE: To obtain a pyrogenic aerosol composition useful for producing aerosol products of various uses, having proper exothermic action and warmth sensing action, comprising an oil, powder of zeolite, a surfactant and a propellant. CONSTITUTION: A pyrogenic aerosol composition comprising an oil, powder of zeolite, a surfactant and a propellant. To be concrete, safflower oil, glycerol, liquid paraffin, propylene glycol, etc., are used as the oil and, for example, coconut oil fatty acid polyoxyethylene (7) glycerol, diethylene glycol monoethyl ether, etc., may be cited as an oil for an aerosol composition for human body.
